Specification

The specification has been checked to the extent necessary to determine the presence of all possible minor errors. However, the applicant's cooperation is requested in correcting any errors of which applicant may become aware in the specification.

This application is in condition for allowance except for the following formal matters:

In claim 4, the recitation "a charge voltage" on line 3 should be corrected as --said charge voltage" for proper support.

In claims 6-7, the recitation "capacitor areas" on line 6 should be replaced with --capacitor size--.

In claim 7, the recitation "an input voltage" on line 4 should be replaced with --said input voltage" for proper support.

Allowable Subject Matter

Claims 1-10 are allowed because the prior art of record does not show the first step of connecting the first capacitor and the second capacitor between the input voltage and ground, and the second step of connecting the first capacitor and the second capacitor to one another to the input voltage and ground as combined in claims 1 and 8.
